

Reenchantment 2026 Digital Press Kit

Project Description

Reenchantment, an independent hypnotic rock and metal solo project lead by multi instrumentalist Victor Fisher, is seeking a strategic industry partner to co-produce and release an ambitious double album. This will complete multitrack versions for all of the songs on the Victor's Archive digital archive that are currently in the demo stage. This album will be released under the Paramusicology label as its first major release, with Victor taking a leading role as visionary auteur, producer, and performer. The songs have all already been written.

While a project of this magnitude requires strategic support due to its large scope, Reenchantment is prepared to transition from an independent creative engine to a professional, market-ready operation. The fact that Victor can independently record multiple instruments, mix and master the project, and do web development will allow the budget to be substantially reduced, and for Victor's unique artistic vision to be preserved. By leveraging your industry reach and production quality assurance, we can ensure this material can scale to its full potential. Although currently an underground entity, Reenchantment represents an immense untapped potential for the music industry. With proper promotion and collaborative quality assurance, the project is poised for significant growth, including future opportunities for live performance and expansion across multiple facets of the music industry and beyond.

Key Assets

- **Victor's Archive:** A proprietary multimedia platform for high-fidelity discovery.
- **Paramusicology:** An independent record label, music and media company with 100% control of writing, master recordings and publishing for Victor's contributions.
- **Academic Foundation:** Relevant BA in Music and Religion.

- **Thematic Core:** An inspirational message focused on “re-enchanting” the world through music and spiritual practice, coupled with thought-provoking, anti-establishment themes designed for a sophisticated audience.
- **Unique Workflow:** Dedicated studio infrastructure enabling unique, independent and experimental production workflows.
- **Collaborative History:** A deep, multi-year creative backstory, featuring long-term collaborations with artists such as Drone Master Pater Shrouder (Aaron Schreiber).
- **Scalability:** Proven DIY commitment and experimental innovation with the potential to evolve from a solo project into a respected and even legendary, multi-faceted rock entity.
- **Interdisciplinary Integration:** A unique bridge connecting commercial music, independent media, academic research, library and information science, spirituality and other areas.
